London, UK | +447389019317 | matheesha528@gmail.com
LinkedIn: matheesha-wishmal | Portfolio: matheesha.github.io

PROFESSIONAL SUMMARY

Dean's List Computing Systems undergraduate specializing in scalable cloud infrastructure and full-stack development. Proven ability to architect complex, data-driven applications (Node.js, Python, Azure) with real-world impact, from forensic media analysis platforms to real-time WebSockets engines. Highly capable of solving complex technical challenges and delivering secure REST APIs within Agile engineering teams.

CORE SKILLS

Languages: Python, Java, C++, HTML5, CSS3, SQL, JavaScript/TypeScript

Backend & Cloud: Node.js, Express, Django, Flask, Microsoft Azure (Blob Storage, Cosmos DB), REST APIs

Frontend: Angular, Vanilla JS, CSS Grid, RxJS, Responsive Design

Databases: MySQL, MongoDB, Azure Cosmos DB (NoSQL)

Tools & DevOps: Git, GitHub, VS Code, Linux, Jira, GitHub Actions, CI/CD, PyTest, Jest, Agile/Scrum methodologies

EDUCATION

BSc Computing Systems

Ulster University | London, UK | Expected Graduation: August 2026

- Achievement: Dean's List Award (2025)
- Relevant Modules: Server Side Development, Systems Security, Data Analytics, Computer Networking, Introduction to Databases, Programming in Practice.

G.C.E Advanced Level | Physical Science Stream

Sri Lanka | 2022

KEY TECHNICAL PROJECTS

AetherLens | Forensic-Grade Visual Intelligence Platform

Node.js, Express, Azure Cosmos DB, Azure Blob Storage, Vanilla JS/CSS

- Architected a full-stack multimedia platform to combat digital misinformation, verifying image authenticity by analyzing 20+ advanced forensic metadata points using Node.js.
- Engineered a scalable cloud infrastructure on Microsoft Azure, achieving high-performance querying and secure asset ingestion via Cosmos DB and Blob Storage.
- Achieved zero-downtime deployments by implementing automated CI/CD pipelines using GitHub Actions to Azure App Services.
- Resolved bottlenecks and optimized backend reliability by integrating Azure Application Insights for real-time request tracing.

CareNexus | Full-Stack Healthcare Intelligence Platform

Angular, TypeScript, Python, Flask, MongoDB, Auth0, JWT, CSS Grid

- Engineered a full-stack SaaS dashboard for real-time hospital capacity management, achieving a 1st Class (80%+) academic grade.
- Secured administrative data and public routing by architecting a Role-Based Access Control (RBAC) system utilizing Auth0 and local JWTs.
- Minimized rendering times and optimized backend performance by implementing server-side pagination for large MongoDB datasets via a Python/Flask REST API.

TaskBidder | Real-Time Negotiation Platform

Python, Django, Django Channels (WebSockets), MySQL, HTML5, CSS, Vanilla JavaScript

- Developed a web-based gig economy marketplace, enabling users to negotiate synchronously via a real-time engine built with Django Channels and WebSockets.
- Ensured secure tracking of active negotiations by architecting a fully normalized (3NF) MySQL database managed via the Django ORM.
- Executed end-to-end product development across two-week Agile sprints, achieving full requirement coverage using MoSCoW prioritization and ensuring code reliability with PyTest.

Personal Portfolio Website

HTML, CSS, JavaScript

- Showcased academic achievements by building and seamlessly deploying a responsive, accessible portfolio using HTML5, CSS3, JavaScript, and GitHub Pages.

PROFESSIONAL EXPERIENCE

Café Assistant | Kahfi | London, UK

January 2024 – Present

- Ensured cash flow security by processing high-volume financial transactions accurately using POS systems.
- Multitasked effectively between operational duties and customer service, maintaining high hygiene standards under pressure.

Retail Associate | TK Maxx & Homesense | London, UK

October 2024 – December 2024

- Executed complex inventory logistics and large-scale deliveries, ensuring accurate stock data handling.
- Demonstrated reliability and efficiency in a high-pressure environment, resolving customer queries promptly.
